PROJECT : Smart Home Automation System

Technologies: HTML, CSS, Javascript, Ionic, Python

Description: Designed and implemented a smart home automation system that allows users to control and monitor their home devices remotely.

Roles and responsibilities:- Engaged in hands-on exercises and projects to apply JavaScript concepts and build interactive web elements.

- Gained exposure to Python programming through online tutorials and coding challenges.

- Collaborated closely with designers to ensure seamless integration of UI/UX elements and optimal user interaction.

PROJECT 1: E-commerce Website**Technologies:** HTML, CSS, Bootstrap, JavaScript, React.js**Description:** Developed a full-fledged e-commerce website to provide users with a seamless online shopping experience.**Roles and responsibilities:-** Implemented client-side interactivity with JavaScript and React.js, including product catalog navigation and real-time cart updates.**PROJECT 2:** Personal Portfolio Website**Technology Used:** HTML, CSS, Bootstrap, JavaScript ,XML, React.js**Project Description:** Created a dynamic and visually appealing personal portfolio website to showcase my skills, projects, and achievements. This website serves as a digital resume, providing potential employers and clients with a comprehensive overview of my capabilities and experience.

PROJECTS

Job Search Platform**Technology Used:**Front-end: HTML, CSS, Bootstrap, JavaScript, React.js**Back-end:** MySQL**Project Description:**

Developed a comprehensive job search platform to help users find and apply for job opportunities. The front-end, built with HTML, CSS, and Bootstrap, provides an intuitive and mobile-responsive user interface. JavaScript and React.js were utilized for dynamic features such as real-time job filtering, application tracking, and personalized job recommendations. The back-end, powered by MySQL, stored user profiles, job listings, and application history.

Netflix Clone**Technology Used:**Front-end:HTML, CSS, Bootstrap, JavaScript, React.js**Project Description:** Developed a Netflix clone, a streaming platform that allows users to browse. The front-end, created with HTML, CSS, Bootstrap, and React.js, offers an immersive and responsive user interface for content discovery and playback. JavaScript is used for dynamic functionalities.**Personal Portfolio Website****Technology Used:**Front-end: HTML, CSS, Bootstrap, JavaScript ,XML, React.js**Project Description:** Created a dynamic and visually appealing personal portfolio website to showcase my skills, projects, and achievements. This website serves as a digital resume, providing potential employers and clients with a comprehensive overview of my capabilities and experience.
